Objective

Seeking a mutually beneficial position in a medium-size environment that will leverage over a decade of experience designing, implementing, and supporting Microsoft®-centric network infrastructures.

Certifications

Microsoft MCP: Microsoft Certified Professional (x4)

April 1997 - #063
March 1998 - #067 & #068
June 2005 - #70-270

Verizon CTC: GTE Certified Teledata Consultant

January 1998

Summary of Qualifications

- Over fifteen years of experience with PC's, LAN/WANs, Telephony, and Information Technology. "Jack-of-all-Trades" with substantial Microsoft product & resource expertise.
 - Deployment & management of Microsoft products and technologies including: Active Directory (ADSI), .NET, ASP®, DFS, Exchange®, IIS, ISA, SharePoint®, RIS, t-SQL, WINS, WMI, and all versions of MS-Office® and Windows® operating systems.
 - Experience with IT industry-based standards, including: (D)HTML, CSS, ODBC, SQL, PKI/SSL, SMTP, SNMP, TCP/IP, Unix/Linux, & XML/XSL.
 - Vendor-trained and/or extensive exposure to industry products, including: Cisco, Oracle, Lucent, Hewlett-Packard, Symantec & Veritas.
 - Coding experience including small-database design, administrative scripts, and Intranet development.
 - Primary experience with single-domain, multi-site heterogeneous architectures containing from 5-15 servers and 50-150 desktops.
 - Strong systems security (mid-level) background with proven track record for systems fault-tolerance, availability, and data integrity. "White-hat".
 - Industry backgrounds include finance, education, health care, manufacturing, law, and general IT ("dot.com").
 - Familiarity with numerous legal requirements, industry standards and best practices, including: EIA/IEEE, Gramm-Leach-Bliley, Sarbanes-Oxley, MSRMD, ISO 9000, OSI, SS-7 & W3C.
 - Comfortable supporting all network equipment from desktops & servers, to routers, printers, switches, SAN/NAS' and PBX equipment.
-
